CoPPA London

Social Media and the Internet: dangers, capacity and difficult conversations

Jeff Goodright, Director at Cyber Spider
Dr Sam Batstone, Consultant Clinical Neuropsychologist

CoPPA London is delighted to invite you to attend this event where we will discuss safe access to social media and the internet, including the ethical and practical considerations that arise.

Jeff Goodright will talk about the practicalities of enabling vulnerable people to access social media and the internet, including accessing sex and dating websites. Dr Sam Batstone will focus on assessing capacity in this domain and how to handle the difficult conversations that necessarily follow.

Please join us for discussions and drinks after the seminar – a great opportunity to meet and network with like-minded colleagues and professionals. Places are limited. RSVP at the email address below to book. This is an in-person only event, but it will be recorded for members unable to attend on the day.
